A COLLABORATIVE AND SOLUTION-BASED APPROACH

Through public awareness campaigning and political lobbying, our united goal is to secure public and political opposition towards the dog meat trade throughout Indonesia.

With proven experience and expertise in delivering effective public awareness campaigns, and in working in collaboration with local and central governments to pass and implement laws and regulations to end cruel practices and strengthen animal protection legal provisions, we are well positioned to tackle Indonesia's cruel and dangerous dog meat trade.

There is an ever-growing oppositions to the dog meat trade and we are committed to working with local and international partners to raise the profile of this issue and to ensure the strengthening and enforcement of laws that will banish this suffering to the history books.
